SPECIFICATION:

Model	GWY-700S	Core Outer Diameter Range	450–1300mm
Minimum Finished Inner Diameter	300mm	Maximum Finished Height	340mm
Applicable Wire Diameter Range	1.0–4.0mm	Wire Storage Ring Diameter	600mm
Wire Storage Ring Specification	50mm / Customizable	Winding Head Forward/Backward Stroke	600mm
Winding Head Height Adjustment Stroke	150mm	Maximum Load of Iron Core	800Kg
Tape Storage Ring Diameter	600mm	Tape Storage Ring Specification	20/30mm
Tape Wrapping Head Forward/Backward Stroke	600mm	Tape Wrapping Head Height Adjustment Stroke	150mm
Tape Wrapping Head Driving System	Servo Motor	Winding Head Driving System	Servo Motor
Wire Arranger Driving System	Servo Motor	Working Power Supply	220V/50Hz
Total Machine Weight	Approx. 1200kg	Overall Dimensions	2300*1600*1750mm

Core Functional Features:

1.Both the winding head and tape wrapping head are equipped with electric forward/backward and lifting functions, which facilitates crane hoisting operations for iron cores and semi-finished coil products.

2.Built-in electric iron core clamping function. The clamping tray adopts a nylon material supporting structure, which will not damage the coils during clamping.

3.The machine is equipped with 3 working modes: integrated winding & tape wrapping linkage, independent single winding, and independent single tape wrapping. It can complete wire winding and insulation wrapping simultaneously, or switch to separate iron core insulation wrapping mode or separate wire winding mode only.

4.Under linkage working mode, the film wrapping head can automatically and accurately track the winding speed to perform synchronous film wrapping operation. It works independently without interfering with the winding head, and features simple & user-friendly operation.

5.The wire storage ring is fitted with an automatic wire guiding device, which realizes automatic tracking and neat arrangement during wire storage. It supports simultaneous winding of wires with multiple diameters and diversified specifications.

6.The two sets of active wire arrangers (iron core rotation driving structure) adopt an electric swing arm clamping structure, together with a front manual telescopic adjustment mechanism (equipped with an automatic elastic tensioner).

APPLICATION:

Toroid Winding Machine is the best suited to toroidal inductor, toroidal transformers,toroidal current transformers,toroidal coil, toroid choke coil, power inductors,UPS inductor,converter inductor and heavy toroidal core etc.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.

2.Guide the user to use accurately and how to maintain the product.

Provide free consultation about production process technology of electronic products.

3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Toroidal Transformer Winding

Machine , Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Toroidal Winding

machine ,we have special skilled

carpenter, who would make the proper wooden case with exact thickness, density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
